Valerie and David,

As requested our office prepared and launched four 24" dia. balloons this morning at the site of the proposed supermarket building in the Dover village Shopping Center. Attached are a series of photos that were taken this morning showing multiple angles around the site. the photos should be very helpful for the board in visualizing the proposed building.

Unfortunately due to the rain and wind today the 4 balloons were destroyed by late morning. The wind and rain drove them to the ground where they popped. These were heavy duty weather balloons!

We have purchased additional mylar balloons today that we plan to launch in the same locations on Friday 4/29 or Saturday 4/30 depending upon the weather . Currently the weather forecast now is for thunderstorms again on Friday and clear & sunny on Saturday.

Please let me know if this makes sense to both of you.

Thanks,

Rich
